TOWNSHIP 30 SOUTH, RANGE 19 WEST, SALT LAKE MERIDIAN, UTAH.

This survey was executed in accordance with the specifications set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions for Group No. 1045, dated March 30, 2007.

The true meridian direction and length of all lines were determined by Global Positioning System (GPS) utilizing Real-Time Kinematics (RTK) observations using the Trimble 5800 model receiver.

Preliminary to the resurvey, the lines of the prior surveys were retraced and search was made for all corners and their calls of record. Identified corners were remonumented in their original positions. Lost corners were reestablished and remonumented at proportionate positions based on the official record. The retracement data was thoroughly verified and only the true line field notes are given herein.

The Cadastral Control Network was derived from GPS Static observations, post processed by the National Geodetic Survey, Online Positioning Users Service (OPUS), utilizing Continuously Operating Reference Stations (CORS): RAIL RAILROAD VALLEY CORS ARP; ECHO ECHO BRGN NV1999 CORS ARP; and P009 MARYSVALE UT2006 CORS ARP.

The geographic position of the section corner of sections 23, 24, 25, and 26, in T. 30 S., R. 19 W., as determined by utilizing National Geodetic Survey O.P.U.S. solution, is as follows:

Latitude:  $38^{\circ}10'40.0277"$  N. Longitude:  $113^{\circ}55'48.6758"$  W. N.A.D. 1983 Elevation 7052.70 ft., N.A.V.D. 1988
